SKILLS

- Languages:** Python, C, C++, Java, JavaScript, PHP, SQL
- Frameworks:** React.js, Tailwind CSS, Vite, Node.js, Angular, shadcn-ui
- Tools/Platforms:** Git, GitHub, Ubuntu (Linux), SQLite, PostgreSQL, AWS (S3, CloudFront)
- Soft Skills:** Analytical thinking, Cross-functional collaboration, Ownership, Adaptability, Leadership

INTERNSHIP

- Infosys** Since Jan 2025
 - ML Intern**
 - Implemented a device-level energy forecasting system using LSTM and Linear Regression, achieving ~90%+ prediction accuracy and reducing forecasting error by ~35% through advanced time-series modeling and feature engineering.
 - Tech stacks used:** Python, TensorFlow/Keras, Flask, Pandas, NumPy, Matplotlib, Scikit-learn
- Yugayatra Retail** Since Dec 2025
 - SDE Intern**
 - Developed responsive UI components across 4+ platforms and optimized REST APIs with server-side pagination, improving page load speed by ~35% and accelerating data retrieval by ~50%.
 - Tech stacks used:** React, Express, AWS, PostgreSQL

PROJECTS

- Everwo - University-Centric Social Platform | [GitHub](#)** Since May 2025

Engineered a scalable full-stack social platform using React and Supabase, supporting real-time posting, authentication, and community management, and onboarding 500+ users from 100+ universities within the first month.

Enhanced data pipelines, database queries, and UI rendering workflows, improving cross-device platform responsiveness and feed load times by ~40%.

Tech Stack: React.js, Tailwind CSS, shadcn-ui, Vite, Supabase (PostgreSQL, Auth, Realtime), Git, GitHub.
- NeuralVitas — Deepfake Detection System | [GitHub](#)**

Developed a CNN-based deepfake detection model achieving ~94% accuracy, leveraging OpenCV-based preprocessing (frame extraction, face alignment) to improve input signal quality by ~30%.

Tuned the training pipeline using data augmentation and hyperparameter tuning, reducing overfitting by ~25% and improving model generalization across unseen data.

Tech Stack: Python, CNN, OpenCV, TensorFlow

CERTIFICATES

- Prompt Engineering and OpenAI — Columbia University | [Link](#) Sept 2025
- Cybersecurity Analyst — TCS Forage | [Link](#) Aug 2024

ACHIEVEMENTS

- Ranked among the Top 25 in University Hackathon:** Apr 2025

Among thousands of participants, developed AI/ML-based solutions and delivered a functional prototype under competitive, time-bound constraints.
- Research Paper Accepted in JETNR Journal:** Oct 2024

Research on *Dynamic Memory Management in Modern Operating Systems*, contributing analytical insights into memory allocation optimization.

EDUCATION

Lovely Professional University	Phagwara, Punjab
Bachelor of Technology - Computer Science and Engineering	Since August 2023
Delhi Public School	Nacharam, Hyderabad
Intermediate	April 2021 - April 2023
Delhi Public School	Nacharam, Hyderabad
Matriculation	March 2020 - March 2021
